

ESKER DeliveryWare 4.0 and SAP®

Connecting Document Delivery with Business Success

While business process efficiency takes a quantum leap forward with SAP software solutions, gains are limited by slow and costly mail or manual fax delivery of business documents. Automating document delivery offers valuable advantages — and a clear challenge to success-minded businesses today.

How do you streamline the rest of the business process?

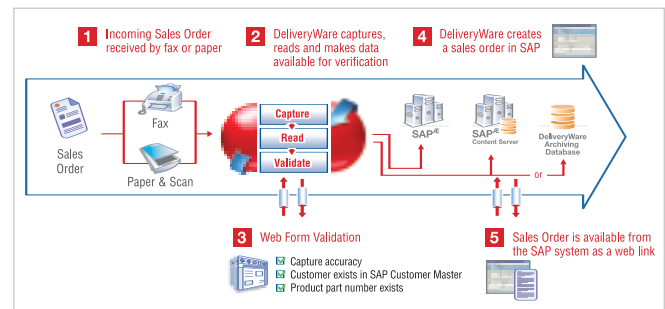

Esker DeliveryWare and SAP solutions work together to help businesses achieve their full potential. Intelligent Esker DeliveryWare Rules automation and SAP-certified integration unite in a comprehensive business document server to...

- Complete the circle of streamlined information exchange, automating the flow of business documents from and to SAP solutions — via the most efficient means and in the most effective formats
- Reap the rewards of faster, easier, more flexible communication — without the risks of custom programming or the expense of consultants
- Eliminate the cost and time of manual tasks such as printing, folding, stuffing, and mailing or faxing outgoing documents — as well as error-prone manual entry of incoming data
- Enable immediate delivery (and notification) of personalized reports, invoices, purchase orders, acknowledgements, and other business documents — from virtually any enterprise source to any destination
- Leverage powerful document formatting capabilities to customize SAP documents — and enhance business communication

Bringing Business directly into SAP

Esker DeliveryWare provides an automated environment for intelli-

gent processing of incoming sales orders, leveraged through the SAP system. Relevant data (customer number, sales order number, etc.) are captured using advanced pattern recognition. Captured data is simultaneously analyzed and validated against SAP master data, then transferred to the SAP SD for order management.

Implementing Esker DeliveryWare takes document delivery outside of SAP, integrating easily with any SAP application module to deliver fast and highly visible results:

- Streamline invoicing, collections, procurement, accounts payable, and any other business process by automating the intercompany exchange of SAP documents
- Simplify the IT infrastructure by replacing multiple document delivery touch points with a single solution
- Shorten cash conversion cycles, reduce labor costs, and increase return on IT investments

Why Esker?

Esker DeliveryWare is built for business. With a rich heritage in the world of large-scale computing, Esker DeliveryWare comes from a proven SAP software partner and a leading worldwide provider of document delivery solutions. Strategic alliances with SAP global software partners demonstrate Esker's expertise in extending and enriching SAP solutions.
